The Zucchini Slice won't require much help, especially if I bring my you-beaut food processor to grate up most of the ingredients. I would say 3 helpers. They can get the slice ready and then assemble simple salads. The method is basically to grate the zucchini, carrot, onion and cheese. The eggs, oil and flour are added and mixed in. Wack it all in a baking dish and bung it in the oven for about 40-50 minutes. Salads need tearing, slicing, washing etc. Perhaps we can have some dressing on hand for those who want it. Commercial would be fine.
